Profile Summary

Versatile Full Stack Developer & AI Engineer with deep expertise in modern front-end ecosystems including Angular, React, and Next.js. Highly proficient in TypeScript and UI frameworks such as Ant Design, ShadcnUI, Tailwind CSS, Bootstrap, and Angular Components—delivering elegant, responsive interfaces with precision and speed. Comfortable across the entire tech stack, with backend experience in Python Django and infrastructure skills spanning Docker, Kubernetes, and AWS EC2.

In the AI domain, I specialize in building intelligent applications using the latest Generative AI frameworks and agentic architectures. Experienced in developing Text2SQL solutions using LLMs, integrating MCPs tools, and orchestrating multi-agent systems for enhanced automation and reasoning. Passionate about R&D and pushing the boundaries of applied AI, I thrive in environments that demand innovation, scalability, and cross-functional collaboration

Education

B.Tech/B.E., 2021

Indian Institute of Technology Indian School of Mines, Dhanbad

Work Experience

Sep 2024 - Present

Software Engineer

e6data

- Built Text2SQL application utilizing MCP tools with Generative AI for complex schemas.
- Developed GenAI pipeline for synthetic SQL query generation & benchmark testing.
- Spearheaded front-end app enabling NLQ to database insights (Next.js, ShadcnUI, Tailwind).
- Set up backend server with Django, Celery, Minio, PostgreSQL, Redis, Qdrant/Chroma.
- Integrated Litellm proxy, Langchain, Langgraph, and AI agents for advanced reasoning.
- Led AI team as Tech Lead for enhanced LLM and agentic system capabilities.

May 2021 - Sep 2023

Software Engineer

CGI

- Developed Micro-Frontends (Angular) adhering to WCAG accessibility

Key skills

- Frontend Development
- HTML
- CSS
- Javascript
- TypeScript
- Angular
- React.js
- Nextjs
- Responsive Web Design
- Redux State Management
- Web Accessibility
- Websocket
- Micro frontend
- Unit Testing
- NU validation
- Eslint
- Developer Tools
- GIT
- Atlassian Tools- Jira/Confluence etc
- Databases
- Docker
- Kubernetes
- AWS EC2
- Third Party API
- Open Source
- Machine Learning
- Artificial Intelligence
- GenAI
- LLM
- LLM frameworks - Langchain Ollama Litellm etc.
- VectorDB
- Langgraph
- AI application
- Text2SQL
- Agentic AI systems

Personal Information

City Bengaluru

Country INDIA

Languages

standards.

- Implemented real-time communication with WebSockets and multi-language support.
- Handled dynamic form inputs/validations, unit testing (Jasmine/Karma).
- Integrated APIs & GraphQL in production systems.

Oct 2023 - Sep 2024

Senior Software Engineer

CGI

- Engineered dynamic scripting POC for interview form automation.
- Developed chatbot using kore.ai bot kit, integrated Whatfix API POC.
- Built demo interface for Harley Davidson Financial Services.
- Integrated third-party APIs with GraphQL mesh & resolvers.
